

OPERATING INSTRUCTIONS

The video input is auto video sensing, when your additional source is switched on the picture will override the navigation map picture. It will revert back to the navigation picture when your source is switched off.

The second input (Camera Input) is activated when the Blue cable is made live (adding a 12v+ supply) This input will override the additional source or the navigation map when activated.

LOCATION & REMOVAL

Ensure the vehicle is equipped with Navigation

All the wires can be accessed at the Navigation computer located under the front seat for L200, and at the WHITE PLUG in the steel box (fig 1 & 2 below) attached to the Navigation computer which is located under the glove box area of the dashboard for other models.

INSTALLATION

Locate the cable which connects the Navigation computer with the monitor. Within this cable you will find the cable colours given opposite. You will then need to cut open the these cables and connect the input and output cables from the supplied harness as the diagram below shows.

NAV (Input)
SCREEN (Out)

16	15	14	13	12	11	10	9
8	7	6	5	4	3	2	1

□ Rear of plug
