LOCATION & REMOVAL

The interface is installed at the DVD / Navigation unit located in the front of the vehicle below the screen.

E60 / E90 / X5

To remove the Navigation unit you will need to remove the trim that houses the two main air vents (1) (trim clips only) then remove 2 screws holding the centre trim that surrounds the navigation unit (2). The trim will then come away (trim clips only) Next remove the screws holding the unit.

(1)

(2)

LOCATION & REMOVAL

2007 MINI

1, Removing the 2 tabs inside top heater vent and 2 screws holding screen surround and round vents.

2, Remove coloured panel behind steering wheel / rev counter and behind CD Changer door and remove 2 screws each side, the surround will now be loose

3, Remove trims either side of centre consol and small trim in front of cigarette lighter

4, Remove 2 screws from each side and 1 from bottom centre

INSTALLATION

Remove the "QUADLOCK" connector (fig01) from the unit and plug it into the supplied harness, plug the supplied harness into the unit. Some additional plugs will need to be transferred to the supplied loom from the male factory connector e.g. the fibre optic plug and white plug (shown below with white arrows)
