LOCATION & REMOVAL

All connections are made at the screen Unit in the front of the vehicle

For Touareg the unit is removed using 4 AUDI/VW removal keys. Removing the unit without the correct keys may cause damage and problems when re-fitting the unit.

For all other models (with SD Card slot at centre bottom) remove the trim that surrounds the unit using a trim tool and remove four screws to remove the unit.

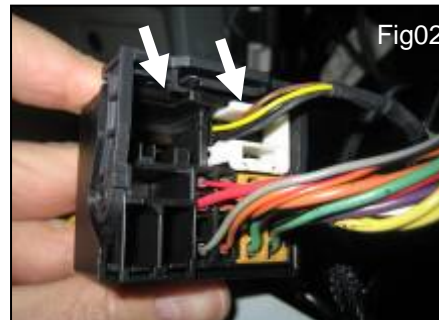

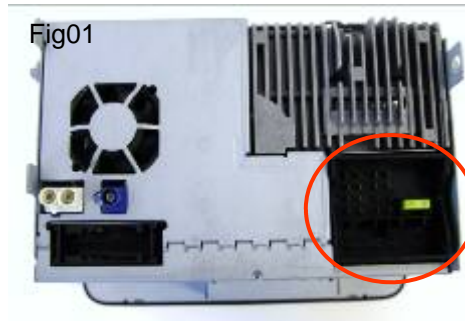

INSTALLATION

Remove the "Quadlock" connector from the unit (**red circle below fig01**) and plug it into the supplied harness.

Then plug the supplied harness into the unit.

Some additional plugs will need to be transferred to the supplied harness from the male factory connector e.g. the green plug and white or blue plug (shown below in **fig02** with white arrows)

OPERATING INSTRUCTIONS

When the interface is fitted the "video in motion" feature will be permanently active, there is no procedure to activate or de-activate the feature.
