LOCATION & REMOVAL

1.All connections are made at the screen Unit in the front of the vehicle

The unit is removed using 4 AUDI/VW removal keys.

Removing the unit without the correct keys may cause damage and problems when re-fitting the unit.

INSTALLATION

Remove the “QUADLOCK” connector (fig01) from the unit and plug it into the supplied harness, plug the supplied harness into the unit. Some additional plugs will need to be transferred to the supplied from the male factory connector e.g. the fibre optic plug and white plug (shown below with white arrows)

When the “Video in motion” feature is active the Navigation may become slightly inaccurate. To solve this the PURPLE cable should be cut and an external switch added to deactivate the “video in motion” feature when using the navigation.

Fig01

OPERATING INSTRUCTIONS

If you have installed the NAVTV “video in motion” interface with an external switch to activate and de activate the feature the switch should be in the on position for the TV Tuner to be viewed whilst in motion.

If you have not chosen to use an external switch on the purple cable the “video in motion” feature will be permanently active.
